

Risk Assessment

The aim of the course is to:

Provide all delegates with the knowledge and skills necessary to allow them to undertake risk assessments in the workplace. We use real-life situations to illustrate the principles of risk assessment in a fast-paced and interactive session.

Who Should attend?

This course is essential for anyone who has some professional responsibility for safe systems of work or for carrying out risk assessments at work. This may include H&S Managers, HR Managers, Facilities Managers or the 'responsible person' or anyone else asked to write or update risk assessments. Our Risk Assessment training course is also ideal for those who need to be able to check on whether safe systems of work and risk assessments provided by others are suitable.

Course summary:

- Risk Assessment – an introduction and legal definitions.
- The law and your obligations.
- Hazards and risks.
- Who might be harmed?
- How to control the risks.
- Recording your findings.
- Reviewing your risk assessments

Course Duration: 1 Day

Certification: Inhouse STS Certification
